

## Circulatory System

1. The \_\_\_\_\_ works as a transport system of the body.
2. The heart is made up of \_\_\_\_\_
3. The left and right \_\_\_\_\_ are collecting chambers; the left and right \_\_\_\_\_ are pumping chambers.
4. There are two sets of \_\_\_\_\_ in the heart that keep blood flowing in one direction.
5. The heart's right side pumps blood only to the \_\_\_\_\_. The heart's left side pumps blood to the \_\_\_\_\_.
6. \_\_\_\_\_ are thick-walled and these are the vessels that carry the blood away from the heart.
7. \_\_\_\_\_ carry blood to the heart.
8. \_\_\_\_\_ connect arteries to the veins. \_\_\_\_\_ takes place in the capillaries.
9. The \_\_\_\_\_ returns excess fluid to the blood.
10. \_\_\_\_\_ occurs when arteries contract and become too narrow.
11. A \_\_\_\_\_ is caused by blockage of the coronary blood vessels.
12. Many heart problems can be avoided by doing \_\_\_\_\_, eating a \_\_\_\_\_, not \_\_\_\_\_ and relaxing.

Four chambers	arteries	lungs
Heart attack	High blood pressure	Balanced diet
Exchange of gases	valves	atria
Rest of the body	capillaries	exercise
smoking	Circulatory system	Lymphatic system
verticles	XXXXXXXXXX	veins
